

Science :- Progression of Knowledge and Skills

		The Foundations of Science in the EYFS			
Nursery		Three and four year olds	Communication and Language		Understand 'why' questions, like: "Why do you think the caterpillar got so fat?"
			Personal, Social and Emotional Development		Make healthy choices about food, drink, activity and tooth brushing.
			Understanding the World		- Use all their senses in hands-on exploration of natural materials. - Explore collections of materials with similar and/or different properties. - Talk about what they see, using a wide vocabulary. - Begin to make sense of their own life- story and family's history. - Explore how things work. - Plant seeds and care for growing plants. - Understand the key features of the life cycle of a plant and an animal. - Begin to understand the need to respect and care for the natural environment and all living things. - Explore and talk about different forces they can feel. - Talk about the differences between materials and changes they notice.
Reception			Communication and Language		- Learn new vocabulary. - Ask questions to find out more and to check what has been said to them. - Articulate their ideas and thoughts in well-formed sentences. - Describe events in some detail. - Use talk to help work out problems and organise thinking and activities, and to explain how things work and why they might happen. - Use new vocabulary in different contexts.
			Personal, Social and Emotional Development		- Know and talk about the different factors that support their overall health and wellbeing: -regular physical activity -healthy eating -tooth brushing -sensible amounts of 'screen time' -having a good sleep routine -being a safe pedestrian
			Understanding the World		- Explore the natural world around them. - Describe what they see, hear and feel while they are outside. - Recognise some environments that are different to the one in which they live. - Understand the effect of changing seasons on the natural world around them.
		E.L.G.	Communication and Language	Listening, Attention And Understanding	Make comments about what they have heard and ask questions to clarify their understanding.
			Personal, Social and Emotional Development	Managing Self	Manage their own basic hygiene and personal needs, including dressing, going to the toilet and understanding the importance of healthy food choices.
			Understanding the World	The Natural World	- Explore the natural world around them, making observations and drawing pictures of animals and plants. - Know some similarities and differences between the natural world around them and contrasting environments, drawing on their experiences and what has been read in class. Understand some important processes and changes in the natural world around them, including the seasons and changing states of matter.

Science :- Progression of Knowledge and Skills

		Working scientifically	Term 1 Animals, Humans. Evolution and inheritance (milestone 1 only)	Term 2 Investigating materials.	Term 3 Light and seeing. Understanding Earth's movement in space.	Term 4 Investigate movement, forces, magnets. Sound and hearing.	Term 5 Plants, Evolution and inheritance (milestone 2 & 3) Investigate living things (milestone 2 & 3)	Term 6 Investigate living things (milestone 1 only) Electric circuits Materials (milestone 2 & 3)
Year 1	Milestone 1	- Ask simple questions - Observe closely, using simple equipment. - Perform simple tests. - Identify and classify. - Use Observations and ideas to suggest answers to questions. - Gather and record data to help in answering questions.	- Identify and name a variety of common animals that are birds, fish, amphibians, reptiles, mammals and invertebrates. - Identify and name a variety of common animals that are carnivores, herbivores and omnivores. - Describe and compare the structure of a variety of common animals (birds, fish, amphibians, reptiles, mammals and invertebrates, including pets). - Identify name, draw and label the basic parts of the human body and say which part of the body is associated with each sense. - Notice that animals, including humans, have offspring which grow into adults. - Investigate and describe the basic needs of animals, including humans, for survival (water, food and air). - Describe the importance for humans of exercise, eating the right amounts of different types of food and hygiene.	- Distinguish between an object and the material from which it is made. - Identify and name a variety of everyday materials, including wood, plastic, glass, metal, water and rock. - Describe the simple physical properties of a variety of everyday materials. - Compare and group together a variety of everyday materials on the basis of their simple physical properties. - Find out how the shapes of solid objects made from some materials can be changed by squashing, bending, twisting and stretching. - Identify and compare the suitability of a	- Observe and name a variety of sources of light, including electric lights, flames and the Sun, explaining that we see things because light travels from them to our eyes. - Observe the apparent movement of the Sun during the day. - Observe changes across the four seasons. - Observe and describe weather associated with the seasons and how day length varies.	- Notice and describe how things move, using simple comparisons such as faster and slower. - Compare how different things move. - Observe and name a variety of sources of sound, noticing that we hear with our ears.	- Identify and name a variety of common plants, including garden plants, wild plants and trees and those classified as deciduous and evergreen. - Identify and describe the basic structure of a variety of common flowering plants, including roots, stem/trunk, leaves and flowers. - Observe and describe how seeds and bulbs grow into mature plants. - Find out and describe how plants need water, light and a suitable temperature to grow and stay healthy.	- Explore and compare the differences between things that are living, that are dead and that have never been alive. - Identify that most living things live in habitats to which they are suited and describe how different habitats provide for the basic needs of different kinds of animals and plants and how they depend on each other. - Identify and name a variety of plants and animals in their habitats, including micro-habitats. - Describe how animals obtain their food from plants and other animals, using the idea of a simple food chain, and identify and name different sources of food. - Identify common appliances that run on electricity. - Construct a simple series electrical circuit.
Y			Identify how humans resemble their parents in many features.					

Science :- Progression of Knowledge and Skills

				variety of everyday materials, including wood, metal, plastic, glass, brick/rock, and paper/cardboard for particular uses.				
Year 3	Milestone 2	- Ask relevant questions. - Set up simple practical enquires, comparative and fair tests. - Make accurate measurements using standard units, using a range of equipment, for example thermometers and data loggers. Gather, record, classify and present data in a variety of ways to help in answering questions. - Record findings using simple scientific language, drawings, labelled diagrams, bar charts, and tables. - Report on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions. - Use results to draw simple conclusions and suggest improvements, new questions and predictions for setting up further tests. - Identify differences, similarities or changes related to simple scientific ideas and processes. - Use straightforward scientific evidence to answer questions or to support findings.	- Identify that animals, including humans, need the right types and amounts of nutrition, that they cannot make their own food and they get nutrition from what they eat. - Construct and interpret a variety of food chains, identifying producers, predators and prey. - Identify that humans and some animals have skeletons and muscles for support, protection and movement. - Describe the simple functions of the basic parts of the digestive system in humans. - Identify the different types of teeth in humans and their simple functions.	Rocks and Soils - Compare and group together different kinds of rocks on the basis of their simple, physical properties. - Relate the simple physical properties of some rocks to their formation (igneous or sedimentary). - Describe in simple terms how fossils are formed when things that have lived are trapped within sedimentary rock. - Recognise that soils are made from rocks and organic matter.	- Recognise that they need light in order to see things and that dark is the absence of light. - Notice that light is reflected from surfaces. - Recognise that light from the sun can be dangerous and that there are ways to protect their eyes. - Recognise that shadows are formed when the light from a light source is blocked by a solid object. - Find patterns in the way that the size of shadows change. <i>Describe the movement of the Earth relative to the</i>	- Compare how things move on different surfaces. - Notice that some forces need contact between two objects, but magnetic forces can act at a distance. - Observe how magnets attract or repel each other and attract some materials and not others. - Compare and group together a variety of everyday materials on the basis of whether they are attracted to a magnet, and identify some magnetic materials. - Describe magnets as having two poles. - Predict whether two magnets will attract or repel each other, depending on which poles are facing. - Identify how sounds are made, associating some of them with something vibrating.	- Identify and describe the functions of different parts of flowering plants: roots, stem, leaves and flowers. - Explore the requirements of plants for life and growth (air, light, water, nutrients from soil, and room to grow) and how they vary from plant to plant. - Investigate the way in which water is transported within plants. - Explore the role of flowers in the life cycle of flowering plants, including pollination, seed formation and seed dispersal. - Identify how plants and animals, including humans, resemble their parents in many features. - Recognise that living things have changed over time and that fossils provide information about living things that inhabited the Earth millions of years ago.	- Identify common appliances that run on electricity. - Construct a simple series electrical circuit, identifying and naming its basic parts, including cells, wires, bulbs, switches and buzzers. - Identify whether or not a lamp will light in a simple series circuit, based on whether or not the lamp is part of a complete loop with a battery. - Recognise that a switch opens and closes a circuit and associate this with whether or not a lamp lights in a simple series circuit. - Recognise some common conductors and insulators, and associate metals with being good conductors. - Compare and group materials together, according to whether they are solids, liquids or gases. - Observe that some materials change state when they are heated or cooled, and measure the temperature at which this happens in degrees Celsius (°C), building on their teaching in mathematics. - Identify the part played by evaporation and condensation
Year 4								

Science :- Progression of Knowledge and Skills

					<i>Sun in the solar system.</i> • <i>Describe the movement of the Moon relative to the Earth</i>	• Recognise that vibrations from sounds travel through a medium to the ear.	• Identify how animals and plants are suited to and adapt to their environment in different ways.	in the water cycle and associate the rate of evaporation with temperature.
							• Recognise that living things can be grouped in a variety of ways. • Explore and use classification keys. • Recognise that environments can change and that this can sometimes pose dangers to specific habitats.	
Year 5	Milestone 3	- Plan enquiries, including recognising and controlling variables where necessary. - Take measurements, using a range of scientific equipment, with increasing accuracy and precision. - Record data and results of increasing complexity using scientific diagrams and labels, classification keys, tables, bar and line graphs, and models. - Report findings from enquiries, including oral and written explanations of	- Describe the changes as humans develop to old age. - Identify and name the main parts of the human circulatory system, and describe the functions of the heart, blood vessels and blood. - Recognise the importance of diet, exercise, drugs and lifestyle on the way the human body functions.	- Compare and group together everyday materials based on evidence from comparative and fair tests, including their hardness, solubility, conductivity (electrical and thermal), and response to magnets. - Understand how some materials	- Understand that light appears to travel in straight lines. - Use the idea that light travels in straight lines to explain that objects are seen because they give out or	Magnets - Describe magnets as having two poles. - Predict whether two magnets will attract or repel each other, depending on which poles are facing. Forces	<i>Relate knowledge of plants to studies of evolution and inheritance.</i> <i>Relate knowledge of plants to studies of all living things</i>	- Associate the brightness of a lamp or the volume of a buzzer with the number and voltage of cells used in the circuit. - Compare and give reasons for variations in how components function, including the brightness of bulbs, the loudness of buzzers and the on/off position of switches. - Use recognised symbols when representing a simple circuit in a diagram.

Science :- Progression of Knowledge and Skills

Year 6		results, explanations involving causal relationships, and conclusions. • Present findings in written form, displays and other presentations. • Use test results to make predictions to set up further comparative and fair tests. • Use simple models to describe scientific ideas identifying scientific evidence that has been used to support or refute ideas or arguments.	• Describe the ways in which nutrients and water are transported within animals, including humans.	will dissolve in liquid to form a solution and describe how to recover a substance from a solution. • Use knowledge of solids, liquids and gases to decide how mixtures might be separated, including through filtering, sieving and evaporating. • Give reasons, based on evidence from comparative and fair tests, for the particular uses of everyday materials, including metals, wood and plastic.	reflect light into the eyes. • Use the idea that light travels in straight lines to explain why shadows have the same shape as the objects that cast them, and to predict the size of shadows when the position of the light source change s. • Explain that we see things because light travels from light sources to our eyes or from light sources to objects and then to our eyes.	• Explain that unsupported objects fall towards the Earth because of the force of gravity acting between the Earth and the falling object. • Identify the effect of drag forces, such as air resistance, water resistance and friction that act between moving surfaces. • <i>Describe, in terms of drag forces, why moving objects that are not driven tend to slow down.</i> • <i>Understand that force and motion can be transferred through mechanical devices such as gears, pulleys, levers and springs.</i> • Understand that some mechanisms including levers, pulleys and gears,	• Recognise that living things have changed over time and that fossils provide information about living things that inhabited the Earth millions of years ago. • Recognise that living things produce offspring of the same kind, but normally offspring vary and are not identical to their parents. • Identify how animals and plants are adapted to suit their environment in different ways and that adaptation may lead to evolution.	• Demonstrate that dissolving, mixing and changes of state are reversible changes. • Explain that some changes result in the formation of new materials, and that this kind of change is not usually reversible, including changes associated with burning, oxidation and the action of acid on bicarbonate of soda.
--------	--	---	--	---	--	---	--	---

Science :- Progression of Knowledge and Skills

					• Describe the movement of the Earth, and other planets, relative to the Sun in the solar system. • Describe the movement of the Moon relative to the Earth. • Describe the Sun, Earth and Moon as approximately spherical bodies. • Use the idea of the Earth's rotation to explain day and night and the apparent movement of the sun across the sky. • <i>Observe and name a variety of sources of sound, noticing that we hear with our ears.</i>	allow a smaller force to have a greater effect • Find patterns between the pitch of a sound and features of the object that produced it. • Find patterns between the volume of a sound and the strength of the vibrations that produced it. • Recognise that sounds get fainter as the distance from the sound source increases.	• Describe the differences in the life cycles of a mammal, an amphibian, an insect and a bird. • Describe the life process of reproduction in some plants and animals. • Describe how living things are classified into broad groups according to common observable characteristics. • Give reasons for classifying plants and animals based on specific characteristics.
